

Green Cleaning Solutions

Committed to Green.

ABM is committed to “green cleaning” - cleaning to protect health without harming the environment. The ABM Green Care program focuses on equipment, tools, supplies and methods. ABM Industries is a member of the U.S. Green Building Council and our Green Care program meets the Council requirements for products and procedures, as well as those set by Green Seal, organizations providing nationally recognized standards for green products and procedures.

Prepared by ABM Janitorial Services for:

COMPREHENSIVE SERVICES

The ABM Green Care program makes a difference.

ABM Green Care incorporates high-efficiency tools and equipment, energy efficient processes, and Green Seal Certified products. ABM green initiatives include:

- Partnerships with industry leaders of high-performance, environmentally responsible products and tools.
- Employee training in the correct product dilution to achieve optimal results, while also minimizing water usage.
- Employee training in the proper use and care of equipment, ensuring that it works correctly and with maximum efficiency.
- Use of post-consumer recycled consumable products in restrooms, including 60% post-consumer waste paper towels and 100% recycled and post-consumer waste toilet tissue.
- Use of flat mops on hard surface floors. They are rectangular shaped and can reach into corners where conventional mops cannot.
- Utilization of new equipment designed with Indoor Air Quality in mind, including HEPA high-filtration vacuums and low-moisture extraction.
- Use of microfiber materials in cloths and mops, providing savings and improved productivity. Microfiber materials use less product and less water, clean more efficiently, and are reusable.
- Color-coded microfiber materials reduce the hazards of cross-contamination between kitchens, rest rooms, copy rooms and restrooms.
- Recycling and waste-reduction programs.
